Advantage:

Company information: More than 10 years production experience,which will promise the best quality for you.

Durable Material: Ancheer Kicker ball is made of 1.0MM PVC, non-toxic,odorless, better sealed for longterm use. UL GREENGUARD approved

Safety Guarantee: this bubble ball has 2 handles inside and 2 adjustable shoulder straps, makes it safer and more convenient.

Easy to use: the bumper Zorb ball can inflate or deflate in 1-2 minutes(use electric air pump)

Maintain & Storage:

1. Disinfect and clean the ball regularly.
2. Check the ball before using. Any damage, please mend it with our repair kit (material patches and glue).
3. After use, please remove sundries outside and inside the ball.
4. Before packing, make sure the ball is clean and dry. Then store it in cool and dry place.

Repair Guidance:

1. Find out exactly where the leak is. Fill a spray bottle with a mixture of soap and water and spray it liberally on the bumper ball along the seams. You will notice that the solution starts to bubble up where the leak is located, so take note of the position of the hole.
2. Prepare the hole for patching. Dry the seam off, and make sure that it is completely deflated before attempting to patch the seam. If you have the patch kit that came with the bumper ball, you can use the prep solution to thoroughly clean the rubber before proceeding. Rubbing alcohol also works.
3. Apply plumber's glue to the seam and let it dry for about 15minutes. If possible, apply some glue to the inside of the seam as well, so that it spreads out and gives an extra layer of protection when the bumper ball pressurizes.
4. Fill the bumper ball about halfway with air and wait another 30 minutes or so to make sure that the glue has dried completely.
5. Inflate the item completely and spray it again with the soap and water mixture to make sure that the hole is indeed fixed.
