

38m Long Green PVC Customized Sky Flying Giant Inflatable Water Slides For Event

Our Product Introduction

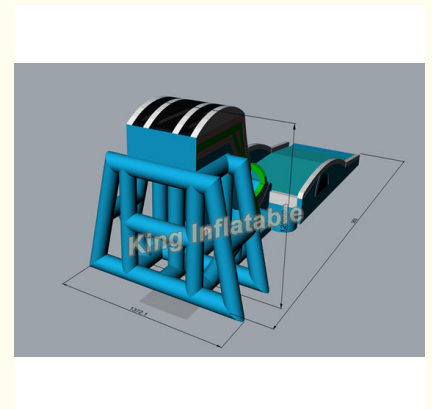

Basic Information

- Place of Origin: GuangZhou, China
- Brand Name: King Inflatable
- Certification: CE, UL, SGS, EN71, EN14960
- Model Number: King-ws080
- Minimum Order Quantity: 1 pc
- Price: USD 15000-20000
- Packaging Details: Heavy-Duty PVC Tarpauline for Inflatables and Carton for air blower
- Delivery Time: 7-15 days
- Payment Terms: T/T, L/C, Western Union, Money Gram, Euro account, US dollar account
- Supply Ability: 300 pcs per month

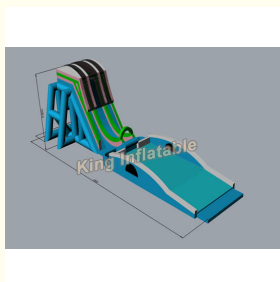

Product Specification

- Material: Plato 0.55 Mm PVC Tarpaulin
- Workmanship: Double And Quadruple Stitching
- System: Constant Blowing System
- Color: Green
- Printing: Available
- Accessories: Suitable Blower And Repair Kits
- Highlight: inflatable water slides for pools, commercial inflatable water slide

Product Description

38m Long Green PVC Customized Sky Flying Giant Inflatable Water Slides For Event

Specifications:

Model No	King-ws080
Material	PVC tarpauline 0.55mm which comply with EN71 and RoHS for the European countries
Color	Green, blue, or any other colors can be customized
Dimension	L38m × W13m × H12m
weight	1800KG
Volume	8.5CBM
Warranty	2 years

Description:

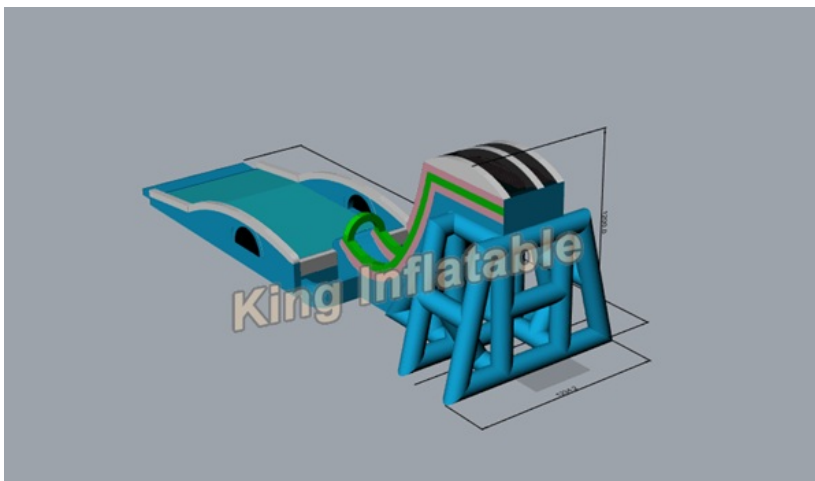

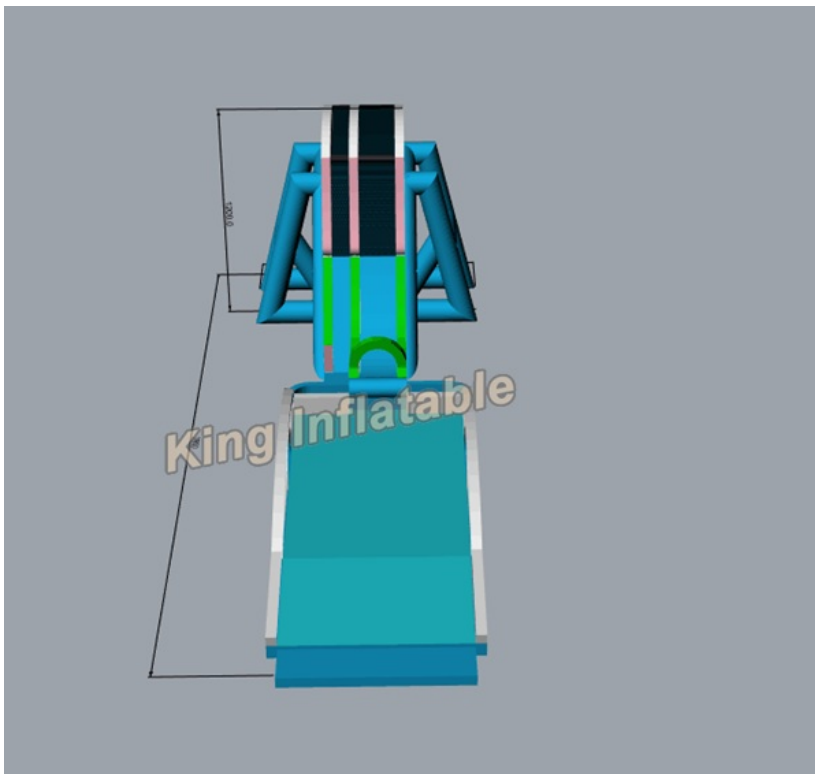

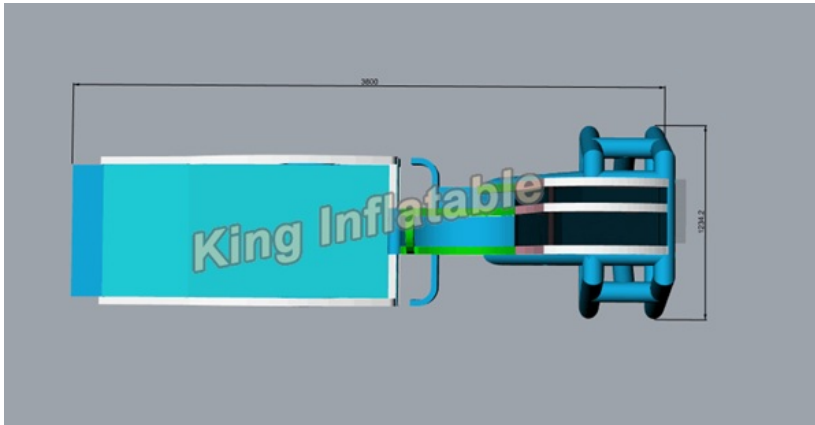

1. Best material is very important for the inflatable sky slide . All inflatable games of King Inflatables are made by high durability fire-retardant 18OZ Tarpaulin, which has 3 layers as you can see from left picture, two coated side with a strong net inside. The flame retardant meet BS7837.
2. King Inflatables will make reinforce strips at the bottom joint and each corner. So when the kids bounce on the games, you do not need to worry about the safety at all. As the bottom can bear the kids no matter how they play on the games.
3. On the inside of every inflation tube lies a simple vinyl flap that is designed to flop closed if air flow is interrupted, thus slowing the loss of air.
4. Most bouncer manufacturers use 1" or 2" netting. A child bouncing can easily catch their fingers in that size of netting, thus serious injuries can happen. Only the Cutting Edge Creations brand employs netting that even a small child's finger cannot penetrate. Yet, the netting is still transparent enough to allow for easy viewing.
5. Baffles that are secured by a 1400x1400 denier material that provides the MAXIMUM strength of the internal baffling of every inflatables. This material upgrade is unmatched by anyone else in the industry. This material is key to the overall durability of the products we sell.
6. We do double stitching everywhere, with fourfold stitching at bottom stress point. Double stitching inside and double stitching outside to make sure the inflatables are strong enough.
7. Unlike others, King inflatables sells products that are easy to use. For example, the deflation zipper utilizes a Hook and loop flap that covers the zipper, thus, less air is lost and zippers are not exposed to abrasion or mischief. The help handle is easy broken when long time use by big kid or adult, as you see, we reinforce it with double strip, and make help handle on the climbing ladder, kids can climb the ladder more easy.
9. Take a close look at the construction of the "D" rings in the products we sell. A tether system is only as strong as its weakest link. Tether points on the inflatable are extremely durable. The "D" ring tethering System have been laboratory-tested by Professional Engineers for use on all giant slides and all other types of inflatables.

Advantage:

1. We have More than 10 years' production experience and many rich-experienced technical workers, so you can get best quality and beautiful goods.
2. Advanced auto machines make production efficiency and quality guarantee .
3. All seams are doubled and fourfold sewed at stress point such as on the corner or bottom. so the items have good airtightness and more durable.
4. For parts like anchor rings and handles, we use the big high frequency welding machine to weld on the products instead of glue on by hand. The parts and the main body are fused together so the quality is very stable and will not peel off.
5. All sensitive position are reinforced where applicable 5-6 stitches in 1 inch to ensure our inflatables strong enough, avoid tearing easily.
6. We use good quality thick PVC material for inside drawstring which help form the inflatable shape. Thick PVC material will be more durable and can last for using time more long.
7. All edges will be hemmed inside with PVC tarpaulin to reduce air leak. So you don't need so many blowers to work at same time.
8. All inflatables were made with a backflow flap to slow down the air leak even the blower failure.
9. All inflatables include a backflow flap to slow down the escape of air from a game in the even of blower failure.
10. All deflate positions have bidirectional zipper and the zipper will be cover with flap, So they can help you deflate the inflatable more quickly. We do reinforcement for all the zipper joints, and above the zipper, there is a zipper cover by material which helps to disperse the zipper's stress. We may also make an inside PVC piece to protect the zipper.

positions have bidirectional zippers and the zippers will be covered with flaps which help deflate more quickly
