Product Description

Descriptions:

There are 3 optional materials for the bouncers and slides: fabric, 0.55mm pvc tarpaulin and 0.9mm pvc tarpaulin. Fabric is mainly used for the mini bouncer, it is the cheapest. 0.55mm pvc tarpaulin is mainly used for the dry castle and slide, suitable and durable, the products made from it can be used for 5-10 years. The most expensive and durable material is 0.9mm pvc tarpaulin which is widely used for water items.

For slide and castle inflatable toys, they are a little heavy in weight usually, so shipping them by sea is a good choice. If you want to save your money, you can buy 2-3 pieces, then ship them together by sea, the total freight will be distributed to each item, as a result that shipping cost for each item will be very cheap.
