Advantages of inflatable water splash park:

1. We add reinforcement strips for all our products, so the items have good airtightness and more durable.
2. We install high quality air relief valve made in on our water parks, so the items can release air to a safety airpressure level automatically when it's getting hot.
3. For parts like anchor rings and handles, we use the big high frequency welding machine to weld on the products instead of glue on by hand. The parts and the main body are fused together so the quality is very stable and will not peel off.
4. Our newly developed eyelet connection system makes the whole water park no gaps and very stable.

Workmanship:

- 1) Reinforcement. We make reinforcements at every weak points like welding seams, inside baffles, connects.
- 2) Durable anchor ring. For anchor ring, we use 316 stainless steel material which last longer than other metal in water.
- 3) Durable parts. All our parts like handles, anchor rings are welded instead of pasted by glue, it's not easy to peel off.
- 4) Stable Connection System. Our company created originally eyelet connection system and anchor ring connection system which make the whole park very stable.

Package and Plugs:

1. For the finished products, we packed with strong PVC tarpaulin (same to the products).

The PVC tarpaulin bag is durable enough to bear the impact during shipment. In order for you to find the products quickly, we have printed our company's logo on outside of package bags.

2. Blower or air pump are packed By PVC bag or carton which suitable for shipment, also been marked outside of the package, so that you can find them quickly and correctly.

3. Different countries have different voltage and different plugs, it will much appreciated if you can tell us what type plug you want, and then we will supply the correct plug to you.
