Why choice us

1. Generally we use PVC bag for packaging so that it is strong enough, if you have special demand about it, please tell us.
2. We are factory with large production line, 10 years experience, professional employees and effective management, main market in USA, Canada, Europe, East Asion.
3. We use hot air welding machine for water park: It can perfectly combine each part of inflatable product and achieve the best quality.

The Manufacturing Process

1. High quality sewing machine: All our sewing machine are high precision sewing machine. We use 9 strand international thread to double stitching outside part and quadruple stitching the bottom stress jointis to ensure the quality, reliability and durability of our product.
2. High definition digital printing machine: Our printing will be more definition than other printing machine. We will make a liquid protective film on the face of digital printing. It will not be sticky and color fade, but sustain for a long time.
3. Hot air welding machine: It can perfectly combine each part of inflatable product and achieve the best quality.
4. Digital cutting machine: It can cut materials automatically in short time, based on which, we can produce more precise and more professional inflatable products in a shorter time.

FAQ
