Tips

After inflatable size,by a set of materials saturation effect of scalability, there will be 1~3cm deviation.

Children need adult supervision when using inflatable products in water. Please pay attention!

Do not inflate the filling during the use of the inflatable product, Please do not inflate more than 85%. In addition, please avoid contacting with the wind, keeping away from the fire.

Advantages:

1.For parts like anchor rings and handles, we use the big high frequency welding machine to weld on the products instead of glue on by hand. The parts and the main body are fused together so the quality is very stable and will not peel off easily.

2.We install high quality air relief valve made in on our icebergs, so the items can release air to a safety level automatically when it's getting hot in the noon.

3.We use a different way to connect the floating tubes and iceberg body, the tubes will not peel off.

4. We use auto-cutting machine to cut the material, the cutting lines are 100% straight and accuracy is high, most competitors use hand cutting.

5. For the material, we use 0.9mm thick(32oz) durable commercial grade PVC tarpaulin .

Order steps:

1). Please choose which items you need, order quantity and all specific requirements if you have.

2). We will give you best price with details.

3). If you confirm the order, we will make Proforma Invoice with order and payment details.

4). We will start production upon receipt of 50% deposit.

5). We will do quality inspection and take photos for your confirmation to check if any modification is required.

6). We will make/release shipment and send you shipping documents upon receipt of the rest payment.
