Product Description

CE Custom Black PVC 10m Inflatable Projector Screen, Inflatable Outdoor Movie Screen

Descriptions:

Inflatable movie screen is an inflatable PVC framework with an attached projection screen. The stability of the framework is guaranteed by a special low-noise air blower, which backs up the high pressure inside uninterruptedly. It is so dependable that even long-term performance over several weeks are not a problem. What's more, our screen will not be easily blown by the wind, causing the playback screen to move, and there will be reinforcement support in the middle of the bracket without causing the frame to collapse in the middle.

The material we choose is 0.55mm PVC tarpaulin, also called 18oz PVC tarpaulin, it's heavy duty SGS certificated with fire retardant and cold-resistant features, also through UV and RoHS test. It's the most popular material for producing sewing inflatables.

The portable inflatable movie screen is suitable for outdoor parties and any other outdoor cinema project theatre backyard.
