#### Usage Method:

- 1, To clear a sharp object, such as broken glass, pebbles, etc., on an open, level floor..... The pool will spread out and finishing smoothly, use the pump according to the instructions of the pool of inflatable inflatable. The inflation force should not be too full, so it can effectively avoid the phenomenon of excessive inflation caused by the explosion, to ensure that the product in the best pressure state. Early (late) a large temperature difference and appeared at noon, should pay attention to timely discharge or air pressure is too large, so as to avoid damage to the product.
- 2, Pay attention to the height of water to the pool. The water level should not exceed the height of the pool 2/3, the water level is too high will cause deformation of the pool rupture.

#### Why choice us:

1. High quality material and high quality workmanship , PVC Tarpaulin 0.9mm in thickness , 1000D\*1000D\*22\*20. The PVC Tarpaulin consists of 3 layers ,with double layers coated a strong net inside , it is very strong .
