#### Advantage:

##### 1.D-ring, Hose, Valve and Rope

The hose or vale are made for filling gas. To keep the beautiful look, valve is the popular choice.

Rope use for linking with secure object on the floor, fix it on the grassland or fasten it to the anchor on the bank to keep the balloon steady. And sometimes the balloon can also place at ground by connecting with sandbag or water bags.

##### 2.Materials and Colors

PVC materials: Weather-resistant, waterproof.

Color: We can make full color digital printing and the pantone colors is available.

#### FAQ:

Q: What are Inflatable Advertising Balloons made of?

A: 0.18mm PVC material, weather-resistant, waterproof, fire-retardant, lead free, UV protective.

Q: How to inflate a Inflatable Advertising Balloons?

A: Usually inflate with helium or hydrogen which is lighter than air, so as to fly up in the air, you may contact your local gas supplier for help. Can inflate with just air to use on ground.

Q: How long do we need to refill/add helium gas?

A: Usually 10 to 30 days to refill/add gas depending on design and use environment.

Q: Can we use Inflatable Advertising Balloons in winds?

A: Yes, we make attached harness lines and tether line for you to tie for stability. Anyway, please use depending on actual environment.

Q: Can we use Inflatable Advertising Balloons in rain?

A: Yes, our PVC material and workmanship is waterproof. Anyway, please use depending on actual environment.

Q: Can make with our logo printings?

A: Yes. This is extra charged depending on quantity, printing colour and size. You may send us high resolution artwork in JPG, PDF or PSD.

Q: What happens if the Balloon punctures?

A: Can simply be repaired by our repair kit (material patches and glue).
