Descriptions:

This product is suitable for outdoor emergency medical aid/help, it can inflate and deflate very fast, and move conveniently. The material is adopted Plato PVC tarpaulin which is the best material for inflatables in China with waterproof, fire resistant, anti-uv. The seams and corners are enforced with strips for getting a more durable quality. The product details are as follows:

- 1, Water proof and fire resistant, can be used in the rainy and sunny days.
- 2, Enough number valves for inflating and fast deflating, it will take about 15mins to inflate it with two pumps, within 2mins to deflate it.
- 3, Many D rings around the bottom and top as anchors with rope to tie a weigh, in case of strong wind to blow it away
- 4, Inside with hooks for hanging something, air condition cable, lights or small things, each hook for ≥ 10 kgs, top no more than 50kgs.
- 5, If under the sun, must not inflate it 100% full, because the air inside would expand to make all the joints too big pressure to stand. 90-95% full is the best. In the night, the air would become cold, and cold contract, the tent will become soft, but it's ok, it can stand it self.
- 6, Reinforced welds, inside the strips is formed by high frequency machine, fully join together with the tent.

Product technique:

We use best PVC tarpaulin 0.25mm/0.35mm/0.45mm/0.55mm or lightweight ripstop nylon material. The PVC tarpaulin and ripstop nylon material both is waterproof, flame resistance, lead free, anti-UV and anti-aging. Strong stainless anchor points provides safety, stability and rigidity to the inflatable tent outdoor. We also can make internal lighting hooks based on your needs. Safe zipper flaps for quick deflation or sandbags, the zipper flaps can be made internal or external, with velcro covering. We supply good quality blower motors and air pumps for inflation, correct plug for customer's power input. We own factory nearby Baiyun International Airport with professional business staff, advanced machines, skilled workers, all production procedures are checked by QC before delivery, so you will get the best service before and after trade, top quality product and factory price, which will recover your cost very quickly.
