Welcome. Pls feel free to send us an email here. You will get our reply in 24 hours

2. Can you change the size and color based on the original?

Yes, King inflatable products can be customized according to your requirements. OEM/ODM are warmly welcomed.

3. Can you print my pictures or logo on the inflatable products?

Yes, we can print your pictures or logo for free.

4. How about the materials used in products?

We use the famous brand 0.65/0.9mm PVC tarpaulin for this product.

5. What's included in products?

Blowers for ground inflatables or air pump for inflatable water games (with certificate of CE/UL), storage bag, repair kits (included PVC materials, glue).

6. Do you ship by Sea, Ground or Air?

We do it all. It just depends on your delivery time, budget and which shipping option you would like to choose for yourself.

Descriptions:

1. For inflatable products, there are 2 types, one is airtight type, you only need to inflate it once, then it can stay about 10 days. Another is constant blowing type, you need to inflate it constantly, it is very fast to be put up and taken down. All the inflatable water products are airtight type, inflatable swimming pool included, because they are welded by high frequency machine. Don't worry, the workmanship is very good, strong welding, what's more, reinforce a strip at the connecting place between the bottom material and the tubes, to bear a very big stress from water in the pool, besides, for the connecting side on the tube, we usually use one extra material to weld it again, to make the tube enough strong.

2. PVC Tarpaulin material is purchased from Plato factory, which has 3 layers, with double coated side with a strong net inside. It can be waterproof and fire-retardant, with CE, EN14960, SGS, EN71, ROHS certificates, good quality and durable. Its thickness is generally 0.4/0.45mm, 0.55mm, 0.65mm and 0.9mm. For inflatable swimming pool, we usually use 0.9mm, real and best material from Plato. You know, best material is very important for all the inflatable products, don't worry, all the materials we use are real and best material.

3. In order to fix the pool to the ground , we will install enough D shaped rings on the tube , you can use some strong ropes to fix it , to make it enough steady , besides , we use 0.9mm PVC Tarpaulin , the weight is very heavy , so it is very difficult to blow it away .

4. In order to keep the water in the pool clear , if you need , we also can add a piece of covering cloth over the water , when you don't use the pool , you can put the covering cloth over the water by using ropes connecting D rings on the tube , in this way , the water is still clear .

5. For inflate and deflate , you can find valve on the pool and connect the valve with air pump , meanwhile , connecting air pump and electricity power , turn on the power of air pump , then it can be inflated about 10 minutes ; For deflate , you only need turn off the air pump , let the air out of valve , it can be deflated about 5-8 minutes .

6. For Inflatable swimming pool , any sizes , shapes , colors , logo can be customized according to your needs . You know , all our products are OEM . Besides , Before the production , our designers will make a 3D design picture for your confirmation , it will be produced according to your demands , with best workmanship .

7. For shipping , If you only buy one piece , shipping by express is the best choice , you can get it at home about 10 days , our production time is about 5 days , the shipping time is about 5 day : If you want buy 2 pieces , shipping by sea DDP or DDU is the best choice , you also can get it at home ; If you buy more than 2 pieces , shipping by sea CIF is the best choice .

8. If you have any needs about inflatable swimming pool , pls tell us the size , shape ,color , logo , we will offer a very competitive price based on good quality . You are always welcome to visit our company website and our factory . We hope we can build a long term cooperation relationship with you .
