Our inflatable medical tent advantage:

1. Easy & convenient to install & Short installation time, install by 2~3 people, inflate by an air pump, 7.55*5.6*3m size took about 15 minutes to complete the construction, one time inflate can last for 15~60 days, until you inflate it again (depend on your local weather situation)
2. Removable and easy to carry;
3. With PVC tarpaulin bottom and 50cm PVC tarpaulin baffle to prevent rainwater from flowing in
4. Good ventilation, with 4 windows and 2 doors made by mesh and PVC tarpaulin
5. Capacity & Size. According to the estimated capacity of your event, our experienced designers will recommend the proper size that is large enough to allow the participants to pass through safely.
6. Lighting system, Inside with D ring and Velcro to cover wires of lighting, also has D ring for hang goods use
7. Color & Print. In order to make your event/resorts/parks much more remarkable and impressive, we can also custom all the inflatables into the proper style of color match, this way your brand VI will deeply impress on all the participants
8. Waterproof, fire and UV resistance made by best Plato PVC tarpaulin material
9. Free Design. Our designers will work with you to create the customized inflatables that is right for you. You can order any of our standard inflatables branded to your company through colors and logos or let us help you with a complete new idea. Our art department will work with you from the initial concept design through bringing the inflatable to reality.

FAQ:

Q: How to inflate an Inflatable Tent?

A: Can inflate by an electric blower/pump included. It usually takes 3 to 30 minutes to inflate a tent depending on the design.

Q: Can we use Inflatable Tent in winds?

A: Yes, the tent itself is usually heavy to stand stably, we make D rings and match ropes for you to tie for more stability. You can also use sand bags or water bags to increase stability. However, please use depending on actual scene.

Q: Can we use Inflatable Tent in rain?

A: Yes but since the blower is connected with electricity (unless grade to Airtight style), we don't suggest long time use under heavy rain although the tent material and blower plastic case are waterproof.

Q: Can make with our logo printings?

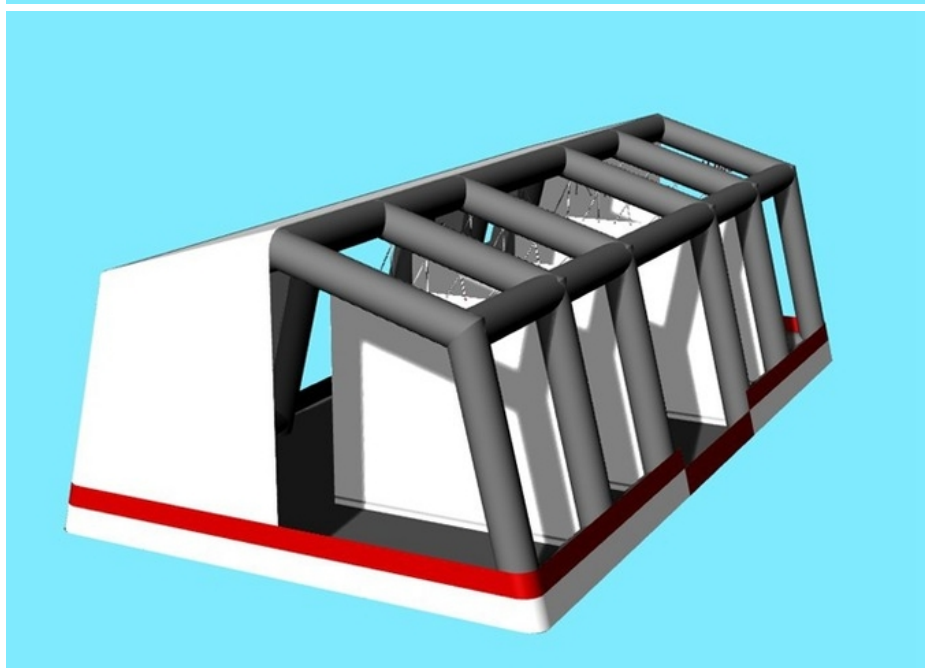

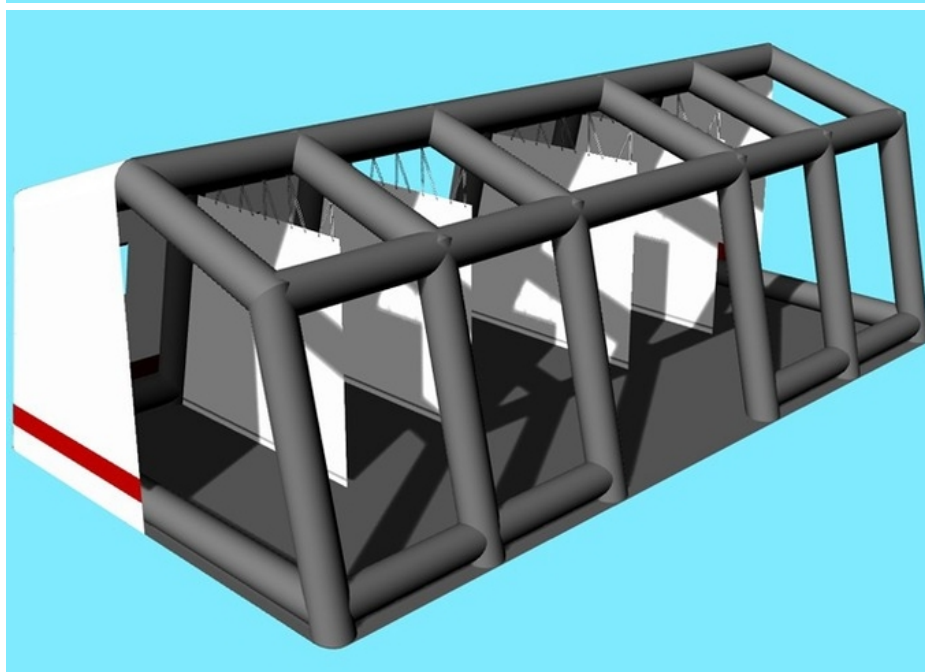

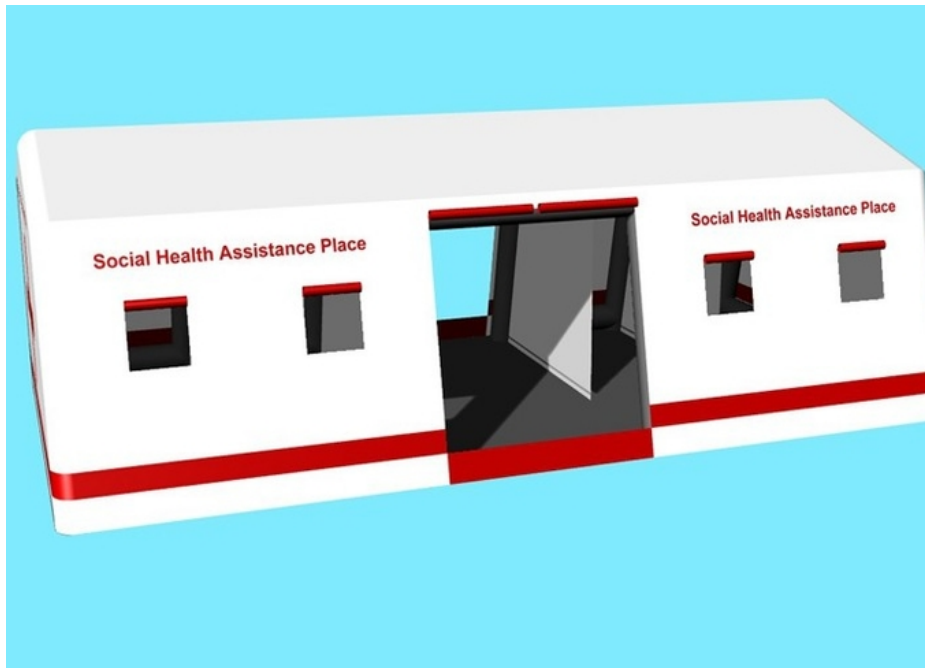

A: Yes. May be for free or charged depending on quantity, printing colour and size. You may send us high resolution artwork in JPG, PDF or PSD.

Q: What happens if the Tent punctures?

A: Due to constant blown air, the tent can still be blown up and use as long as the damage area is not big. The damage can be repaired by sewing machine, and PVC vinyl tents can also simply be repaired by our repair kit (material patches and glue).

Q: What about the quality control?

A: Quality is our culture, our QC will care into every step of production process so that all products strictly complies to EN14960 and SGS Standards.
