Tips

After inflatable size,by a set of materials saturation effect of scalability,ther will be 1~3cm diviation.
Children need adult supervision when using inflatable products in water. Please pay attention!
Do not inflate the filling during the use of the inflatable product. Please do not inflate more than 85%. In addition, please avoid contacting with the wind, keep away from the fire.

Advantages:

- 1.Material: 0.9mm PVC Tarpaulin , waterproof and fire-resistant, anti-uv, etc, stable chemical performance.
2. Size, design and pattern are based on your demand.
3. Our ingenious design team will work closely with you to ensure the design of your finished branded inflatable products match your company brand and events requirements to your complete satisfaction.
4. Better pre-sale and after-sale service. 7 x 24 hours service, We will give you promot response if you have any questions.
5. More professional guidance would be provided for you.
- 6.All our products are reinforced strips, so the items have good airtightness and more durable.So our products use time more than 4 years.
- 7.We install high quality air relief valve on our water toys, so the items can release air to a safety level automatically when it's getting hot in the noon.That will ensure products safety.
- 8.For the anchor rings and handles on our products, we use the big high frequency welding machine to weld instead of glue on by hand. So the parts and the main body are fused together so the quality is very stable and will not peel off.
9. Stable Connection System. King Inflatable created original eyelet connection and anchor ring connection system which make the whole park very stable.
5. We use good quality thick PVC material for inside drawstring which help to form the inflatable shape. Thick PVC material will be more durable and can last for using longer.
