FAQ

Q: What are these inflatables made of?

A: durable oxford cloth or PVC tarpaulin material, weather-resistant, waterproof, fire-retardant, UV protective, 0.25mm to 1.0mm thickness available.

Q: Why PVC tarpaulin more expensive than oxford cloth?

A: PVC tarpaulin is better than oxford cloth mainly by following features:

- 1). excellent abrasion resistance
- 2). outstanding low-temperature performance
- 3). more heavy duty and better wind resistance.
- 4). better printing effect
- 5). very good tear strength
- 6). easy to clean
- 7). easy to repair by glue

Q: How to inflate a Balloon?

A: Can inflate by an electric blower/pump included. It usually takes 3 to 10 minutes to inflate depending on design.

Q: Can we use Balloons in winds?

A: Yes, we make D rings on each balloon and match ropes for you to tie for more stability. You can also use sand bags or water bags to increase stability. However, please use depending on actual scene.

Q: Can we use Balloons in rain?

A: Yes but since the blower is connected with electricity (unless upgrade to Airtight style), we don't suggest long time use under heavy rain although the balloon material and blower plastic case are waterproof.

Q: Can make with our logo printings?

A: Yes. May be for free or charged depending on quantity, printing colour and size. You may send us high resolution artwork in JPG, PDF or PSD.

Q: What happens if the Balloon punctures?

A: Due to constant blown air, the balloon can still be blown up and use as long as the damage area is not big. The damage can be repaired by sewing machine, and PVC vinyl balloons can also simply be repaired by our repair kit (material patches and glue).

Q: Can you send me design sketch to confirm before production?

A: Yes. After you place an order, we can use your custom requirements to make a design sketch, and will start production after your confirmation.
