Product Description

Inflatable Tunnel Outdoor Waterproof Commercial Advertising Large Event Tent Tunnels

Tags: inflatable tent, tent

You can buy an inflatable tunnel from us, we've been making inflatables for over 10 years. Compared to some inflatables we have made, tunnels are fairly basic for us. Whether it's a small 6 foot inflatables or a gigantic 80 to 100 foot custom inflatable. There are an assortment of tunnels you can choose from if you are not interested in a custom tunnel. The two most common types are tubular tunnels and baffled tunnels.

Tubular Tunnels

Tubular tunnels are easier to make than baffled tunnels. They require much less material and time to manufacture compared to baffled tunnels. Tubular tunnels also usually come with a cover that can be printed with your custom graphics.

Baffled Tunnels

Baffled tunnels have more of a ribbed design compared to tubular ones. They also do not require a cover because they are naturally enclosed. They require a lot more material and manufacturing time, so they tend to be heavier and more expensive compared to tubular tunnels.

Whichever type of tunnel you are interested in; custom, tubular, baffled, you can be sure that we can work with you on the design to make sure you get exactly what you are looking for.

Inflatable Structures

We specialize in the sale and rental of all types of giant industrial inflatable shelters.

Our structures offer many advantages for companies with quick needs to install temporary, semi-temporary or permanent shelters, garages or hangars.

INDUSTRIAL DOME ULTRA VERSATILE SHELTERS

King Inflatable structures are designed for companies that need to quickly install temporary, semi-temporary or permanent shelters, garages or hangars. Nowadays, on construction sites, we don't always have the time to wait several long periods or several weeks before having our mega-shelter. Time is often very precious and worth a lot to companies.

One of the main advantages of our structures is the price. In addition to saving a lot of time, we allow our partners to save hundreds of thousands of dollars by choosing our structures.

INSULATION

In addition to being well insulated against cold, humidity and dust, inflatable structures are very robust and very strong. The pressurized air membrane around the tents provides perfect insulation.

Benefits of the inflatable tents

Make your guests comfortable!

Here our inflatable tents illuminated with LED in 7 colors. The colors and patterns can be programmed and changed using the remote control. Inflatable tents are perfect for weddings and outdoor celebrations. It's always magical to celebrate outdoors but we still do not know what mother nature has for us! With our inflatable tents, you are 100% safe. If it rains or if the weather is colder, it can completely close it and if by luck the weather is nice and warm, we can remove the sides quickly. It becomes fully open. The inflatable tent can be mounted in 5 minutes. We place the tent, plug blowers and the tent inflates itself in less than 5 minutes. That's wonderful! The tent has 26 anchor points in total but often 4-6 stakes is enough.

Benefits of the inflatable tents
