Feature:

1. The round inflatable swimming pool is made of 0.9mm pvc tarpaulin and in compliance with EN14960.
2. Easy setup and convenient to be used in different places.
3. The large garden swimming pool have a very long life span and can be customized.
4. Excellent waterproof and fire resistant factors make itself durable in daily use.

Production process

1. Product development and design

We use Rhino, CAD, CDR, AI to complete our design. Accurate to every detail (pulling ring, handle).

2.CNC cutting

High-precision CNC cutting, the data is more intuitive, more accurate, and the error is small.

3. Manual measurement

For places where machine cutting is not possible, manual measurement and cutting are used. High flexibility and easy calculation.

4.High frequency welding

Our company has mature high-frequency welding technology, and high-frequency current connects the products together. Although high-frequency welding is mostly used for metal welding, when used for PVC welding, the welded product is strong and reliable, and has strong tear resistance.

5. Hot air welding

Hot air welding is one of the main welding processes for product manufacturing. The electrodes are heated with preheated compressed air and welded together.

6. stitch

Needle sewing, here we use double-sided sewing procedure. Both beautiful and solid.

7. Product testing

Each product is fully tested (48 hours) before packaging.

8. Compressed air

After testing the product without defects, drain the air and compress the bundle.

9. Clean packaging

Final packaging in clean room.
