Product Description

Inflatable FMX Landing Airbag Snowboard Landing Bag Mattress For Sport Game

Top sheet is seamless and smooth instead of sewing. Landing Airbag is used for indoor and outdoor facilities, such as SNOWBOARD, SKI, SKATE, BMX, FMX, FREESTYLE ACTIVITIES etc. Olympic Size landing bag is available for Olympic Team training freestyle winter sports.

Landing Airbag has 2 chambers with multi-compartment air pockets inside. There are some air vents both sides for softness adjustments. Side bumpers is optional to keep jumpers away from sliding off the side. The material we used is the best brand in China named "PLATO" that is used widely in inflatable industry, it is water-proof, flame-retardant, UV-protected and Eco-friendly.

Inflatable FMX Landing Airbag for Safer Practice

King Inflatable Landing Airbag offers full safe protection for beginners and pros, from dirt to snow. The Landing Airbag can be used for skiing & snowboarding on snow or on a dryslope in the summer, FMX or BMX, for year-round training. Our topsheet for FMX landing airbag is as tough as you can get.

Olympic Size Snowboard Landing Bag for Ski Resorts

King Inflatable is the first supplier of Sloped Snowboard Landing Bag in China. With this Olympic Size Landing Airbag, snowboard & ski riders can train any trick they want in a safe environment, no matter you are beginner or pro. It can be set up in the snow or for summer training with dryslope. Participants feel soft and safe when they land on the Freestyle Airbag with its unique air-chamber technology and multiple air vents for adjusting pressure.

Snowboard Landing Bag

No Bounce Inflatable Landing Ramp Airbag

Compare to other suppliers' airbag, King Inflatable Landing Ramp is in a higher quality without any bounce when you land on it. With the unique multi air pocket technology, our Airbag Landing Ramp will certainly lower your risk when you do FMX or Snowboard training or show. If you are a rookie, the Inflatable Landing Pad is the best tool for your training, improve your tricks and keep you from the injury.

Safer Jump Snowboarding Airbag Training

Many horizontally setup airbags require riders to land to their back, but due to the King Inflatable alignment with the steep landing below the jump, our Snowboarding Airbag will allow skiers and snowboarders with the opportunity to effectively ride out of their trick, allowing them to learn new tricks safely before bringing them to snow.

Snowboarding Airbag

FMX Landing Mattress

Inflatable Airbag FMX Landing Mattress

With a King Inflatable FMX Landing Mattress for your practice you are able to learn new tricks safely before finally taking it to dirt. Everyone who has learned backflip, frontflip etc. on a motorbike knows it is one thing to do it in a foam-pit and a whole different world to do it to dirt. If do it in a foam pit, you may get stuck and wait in gas fumes till you get pulled out by a crane.

MTB Airbag Landing

The shape and size of the King Inflatable MTB Airbag Landing are fully customizable meaning it can be manufactured to cover virtually any landing surface, ramp, hill or contour. The Mountain Bike Airbag consists of 2 layers with adjustable air vents for adjustment of the firmness of both the upper and lower airbag chambers depending on athlete preferences and training targets.

Bike Landing Airbag

Inflatable Bike Landing Airbag is extremely safe, durable, highly transportable and will last much longer than foam. Mountain Bike Airbag Landing is designed with the latest absorption technology, which minimizes impact during a fall and eliminates the catapult effect. You can take it or use it ANYWHERE, just move it around to different events or set it up in your backyard.
