## Product Description

### FMX Sloped Airbag Landing Ultimate Training Scenario For Ski Snowboard Skate BMX

#### Description Of Inflatable Airbag

Landing airbags for MTB, BMX & skate

FMX landing features 1 impact absorbing air chamber for a realistic & safe landing.

The Bike Landing has a single chamber impact absorbing system, with its own internal blower system. It comes with several air valves which allow you to adjust the firmness precisely. Set up a soft chamber when trying tricks for the first time. Ready for the real deal? Set the chamber more firm and get ready to ride out those tricks and progress!

Excellent impact absorption without bounce effect

Set up anywhere, no need to shape dirt

Ready to ride in minutes

#### Ride Away Topsheet Technology

The highly advanced Topsheet material combines strength, durability, flexibility and elasticity. It is neither grippy, nor abrasive allowing you to land and ride away.

#### Highly Advanced Fabrics

We source our materials worldwide and only the most advanced, flame retardant materials have been incorporated in the Bike Landing to provide you with unrivaled durability, strength, reliability and good looks.

#### Innovative Blower System Inside

The innovative blower system is enclosed within the airbag providing protection from the elements, reduced noise, and increased safety by eliminating the risk of kinked blower hoses or unwanted access to the blowers themselves.

#### 3D Visualization

Let our team consult you on the ideal size for your setup along with a free 3D visualization. Send us your logos and we will send you a high quality 3D model to impress your partners and sponsors with a unique brand presentation.
