Giant Advertising Inflatables Word Globe Earth Map Ball LED Hanging Planets

Giant Inflatable Earth

Inflatable planets are the most popular of all our inflatable product lines. We offer all the objects around the galaxy, including poor old Pluto, which doesn't seem to be getting much love these days. For obvious reasons, Earth is naturally one of the more popular models in this lineup, but is usually customized with a printed logo or slogan. Our inflatable planets come in sealed and non-breathable styles. The impermeable models must be inflated separately, but are then sealed and do not require plugging in. Symposiums, museums and even concert halls use our sealed inflatable planets to decorate their venues because they do not make any noise and do not need to be constantly inflated.

The Eight Planets inflatable balloon has good usage. Because it is made of PVC material, waterproof and durable, reusable and effective, it can be suspended from the ceiling, on the ground, floating in the air, hanging in the water, the decorative ball is very beautiful, it can also be illuminated with LED.

Suitable for various scenes, such as festivals, bars, stages, new product launches, sports games, opening events, etc.
