## Product Description

### Inflatable Arches Pink Bicycle Race Sport Game Inflatable Start Finish Line Arch

#### Sealed Inflatable Arches - Angled Shapes

King inflatable arches are slimmer than traditional arches due to their higher internal pressure. They have better weather resistance, better stability, no risk of collapse and no noise from blowers (constant inflation). Customers choose King inflatable arches because they are easy to install and safe.

King beveled inflatable arches are a great branding space and a popular choice for a variety of sporting events. King pneumatic arches are an alternative to the beveled shape and have been well tested at hundreds of events in many countries around the world.

Sealed Inflatable Event Objects

Shapes are a group of sealed inflatable objects - a safe and quiet alternative to traditional inflatable objects powered by a permanent blower.

The arches are all made up of a strong polyester outer skin and sealed polyurethane airbags that provide excellent stability and safety even in extreme weather conditions. Because it is sealed, no permanent electrical connection is required. It only needs to be inflated with a fan or electric pump. The entire surface of the object is fully printable using dye sublimation technology. Even the largest arch in our product line can be placed in your car and set up quickly with only 1-2 people. Make your event more attractive - choose King!

Extremely safe

We know that standard inflatable arches are completely dependent on the power supply, but we are not the standard. King sealed arches are independent of the power supply and therefore more stable in the weather as they are inflated to a higher pressure. We are here to make your event life easier.
