Specifications of a typical bouncy castle may include:

Size: Bouncy castles can range in size from small backyard models to large commercial models that can accommodate 4-5 of children.

Material: Most bouncy castles are made from durable, puncture-resistant materials such as PVC or vinyl.

Weight Capacity: The weight capacity of a bouncy castle varies depending on its size and construction, but they can typically support 4-5 children at once.

Inflation: Bouncy castles are typically inflated using an electric pump, which can vary in power and speed depending on the size of the castle.

Safety Features: Bouncy castles should have safety features such as netting and padded walls to prevent children from falling out, as well as anchor points to keep the castle securely in place.
