- 2.Please ensure the player do not take any sharps when playing in the ball.
- 3.Please use the water ball in water ground only.
- 4.Store the ball at dry place when not used, do not store it together with sharps.
- 5.Please play the ball in good weather. Suitable temperature is 20 degree to 40 degree.
6. weaker people with heart disease and high blood pressure are prohibited to participate in the water ball.

#### FAQ:

Q: Why TPU more expensive than PVC?

A: TPU is better than PVC mainly by following features:

- 1). excellent abrasion resistance
- 2). outstanding low-temperature performance
- 3). excellent mechanical properties, combined with a rubber-like elasticity
- 4). very good tear strength
- 5). high elasticity& transparency
- 6). good oil and grease resistance
- 7). more mycete-proof

Q: What happens if the ball punctures?

A: The damage can easily be repaired with repair kit (material patches and glue).

Q: Will players get injured inside a Water ball?

A: No. This is one of the safest fitness activities in the world, it is made of soft material. But pls don't play inside more than 10 mins because it is a close space.

Q: How to inflate Water ball?

A: The balls are inflated by an electric air pump. It takes minutes to inflate a ball.
