#### Descriptions:

1. For Inflatable swimming pool , any sizes , shapes , colors , logo can be customized according to your needs . You know , all our products are OEM . Besides , Before the production , our designers will make a 3D design picture for your confirmation , it will be produced according to your demands , with best workmanship .

2. As we know , all the water products are airtight type , so this big water pool with single layer is also airtight product you only need to inflate it once , then it can stay about 15 days . AS they are welded by high frequency machine . Don't worry , the workmanship is very good , strong sealing , what's more , reinforce a strip at the connecting place between the bottom material and the tubes , to bear a very big stress from water in the pool , besides , for the connecting side on the tube , we usually use one extra material to seal it again , to make the tube enough strong . Another is constant blowing type , you need to inflate it constantly , It is very fast to be put up and taken down , but it is for inflatable bouncy castle , water slide and some advertising inflatable .

3. You know ,PVC Tarpaulin has 3 layers ,with double coated side with a strong net inside , It can be waterproof and fire-retardant , with CE,EN14960,SGS,EN71,ROHS certificates , good quality and durable. Its thickness is generally 0.4/0.45mm , 0.55mm , 0.6mm and 0.9mm , For inflatable swimming pool , we usually use 0.6/0.9mm , real and best material from plato .You know , best material is very important for all the inflatable products , don't worry , all the materials we use are real and best material .

4. In order to fix the pool to the ground , we will install enough D shaped rings on the tube , you can use some strong ropes to fix it , to make it enough steady , besides , we use 0.9mm PVC Tarpaulin , the weight is very heavy , so it is very difficult to blow it away .

5. For inflate and deflate , you can find valve on the pool and connect the valve with air pump , meanwhile , connecting air pump and electricity power , turn on the power of air pump , then it can be inflated about 10 minutes ; For deflate , you only need turn off the air pump , let the air out of valve , it can be deflated about 5-8 minutes .

6. In order to keep the water in the pool clean , if you need , we also can add a piece of covering cloth over the water , when you don't use the pool , you can put the covering cloth over the water by using ropes connecting D rings on the tube , in this way , the water is still clean .

7. For shipping , If you need it urgently , by air is good ; if you don't need it urgently , by sea is okay .

8. Generally, the round pool is better than the square pool , because the round one can bear a bigger stress from water for the water stress is balanced , so we suggest you should be choose the round pool if you don't care about the shapes .

9. If you have any needs about inflatable swimming pool , pls tell us the size , shape ,color , logo , we will offer a very competitive price based on good quality . You are always welcome to visit our company website and our factory . We hope we can build a long term cooperation relationship with you .
