<b>Anchor or D-ring</b>	Anchor or D-rings to keep stability and safety		
<b>After-service</b>	100% responsible for faults of quality under correct use		

#### FAQ

Q: How to inflate an Inflatable Tent?

A: Can inflate by an electric blower/pump included. It usually takes 3 to 30 minutes to inflate a tent depending on design.

Q: Can we use Inflatable Tent in winds?

A: Yes, the tent itself is usually heavy to stand stably, we make D rings and match ropes for you to tie for more stability. You can also use sand bags or water bags to increase stability. However, please use depending on actual scene.

Q: Can we use Inflatable Tent in rain?

A: Yes but since the blower is connected with electricity (unless upgrade to Airtight style), we don't suggest long time use under heavy rain although the tent material and blower plastic case are waterproof.

Q: What happens if the Tent punctures?

A: Due to constant blown air, the tent can still be blown up and use as long as the damage area is not big. The damage can be repaired by sewing machine, and PVC vinyl tents can also simply be repaired by our repair kit (material patches and glue).
