#### Details :

- 1: The inflatable is to be clear of any hazards and water exits.
- 2: The inflatable is to be positioned in such a manner that jumping or exiting from inflatable can not make contact with any potential hazards.
- 3: A minimum depth of water is essential for the safe operation of inflatables. The minimum depth of water should be the height of the inflatable, plus the height of user (based on 1.8m) divided by two as set out in the evaluation guide below.
- 4: In outdoor environments consider the risk of wind gusts on windy days as this may affect the stability of the inflatable.
- 5: During designated inflatable sessions, unless the use of the area where the inflatables are located is exclusive to users of the inflatable, other swimmers or users should be segregated from the immediate area around the inflatable by way of pool ropes or other suitable equipment.
- 6: In the event of overloading or over-inflation, the fabric itself may split leading to deflation resulting in unsafe situation.
- 7: Electric fans/blowers are to be sited well away from the pool side, the public and any wet areas.
- 8: Electric components must be installed with the voltage and grounding requirements as required by the local governing authorities.
