- 3; We set up new factory in the year of 2013, it is 8000 Square meter.
- 4; Our Equipment : 3 sets cutting machine, 1 set Japanese imported printing machine, 1 set coated machine, 50 sets sewing machine, 5 sets of Heat sealing machine.

How to repair the water park?

1. Find out exactly where the leak is. Fill a spray bottle with a mixture of soap and water and spray it liberally on the water sports along the seams. You will notice that the solution starts to bubble up where the leak is located, so take note of the position of the hole.
2. Prepare the hole for patching. Dry the seam off, and make sure that it is completely deflated before attempting to patch the seam. If you have the patch kit that came with the water sports, you can use the prep solution to thoroughly clean the rubber before proceeding. Rubbing alcohol also works.
3. Apply plumber's goop liberally to the seam and let it dry for about 15 minutes. If possible, apply some goop to the inside of the seam as well, so that it spreads out and gives an extra layer of protection when the water sports pressurizes.
4. Inflate the water sports halfway with air and wait another 30 minutes or so to make sure that the goop has dried completely.
